

Exp-5 Resume Website

Aim: To make a Resume website using HTML and CSS.

Theory: This HTML file represents a resume webpage for *Sneh Naik*, structured using basic HTML and CSS. The page follows a simple layout with sections such as:

1. Header – Displays the name, profession, and contact details.
2. Summary – Highlights key skills and experience as a Full-Stack Developer.
3. Experience – Lists internship experience at Gateway Corp, detailing full-stack projects.
4. Education – Mentions the university, course, and study period.
5. Skills – Lists technical skills in development and tools.
6. Projects – Describes two full-stack web applications (Books Management App & Cash Flow Manager) built with the MERN stack.

Sample:

ABIGAIL HALL Senior Business Analyst Data Analytics Expert abi.hall@enhancv.com • LinkedIn.com • San Francisco, CA	
Summary Seasoned IT business analyst with over 12 years in business analytics, specializing in data visualization and BI software, including Qlikview and SAS. Demonstrated success in leading major analytics dashboard projects that enhanced reporting efficiency by 30%. Expertise extends to Agile and Scrum methodologies, JIRA, SQL, ETL, and Master Data Management.
